

## Project Context: Aziz Barwaniwala Portfolio

This is my personal portfolio website built with React, Tailwind CSS, Framer Motion, and React Icons.  
It is hosted on Vercel, auto-deploying from the main branch of GitHub.

---

### Purpose

The website showcases my skills, projects, and professional journey.

It must stay synchronized with my resume (Aziz-Resume\_2025.pdf).

Whenever there are differences in dates, roles, skills, or project details, the website should be updated automatically to match the resume.

---

### Key Rules

#### 1. Resume is the single source of truth

- Dates, project details, and internships should always reflect what is in Aziz-Resume\_2025.pdf.
- For example:
  - JLL internship should be March 2025 - June 2025, not "Present".
  - I-Class internship should be April 2022 - Sept 2022.
  - Forklift Data Automation project dates should be updated according to the resume.

#### 2. About Me Section

- Remove the word "billionaire".
- Keep tone professional and aspirational, e.g. highlight passion for AI, Data Science, and impactful solutions.

#### 3. Projects Section

- Current projects should match resume details.
- Add DailyPrompts App once details are provided in README.md (temporary placeholder until updated).
- Each project card must have a GitHub redirect:
  - Comment Spam Detection -> GitHub Repo: <https://github.com/azizz7/text-classification-nlp-app>

- Others -> Link will be added later when repos are uploaded.

#### 4. Technical Skills

- Should always match the resume:
- Languages: JavaScript (ES6+), Python, SQL, HTML/CSS
- Web/Mobile: React.js, Node.js, Express.js, React Native, REST APIs
- Databases: MongoDB, PostgreSQL (Supabase), SQLite, MySQL
- AI/DS: TensorFlow, pandas, NumPy, Matplotlib, Seaborn
- Tools: Git, GitHub, VS Code, IntelliJ, Expo, Streamlit, AWS, Power BI, Tableau

#### 5. Experience Section

- JLL internship should say March 2025 - June 2025.
- Motherson internship -> June 2024 - July 2024.
- I-Class internship -> April 2022 - Sept 2022.

#### 6. Contact Section

- The form currently doesn't work.
- It should use EmailJS or a simple backend (Node/Express API) to send messages directly to my email: [azizbarwani5253@gmail.com](mailto:azizbarwani5253@gmail.com).
- Ensure success/error notifications are shown.

---

#### Style Guidelines

- Keep the dark theme with neon accents consistent.
- Use Tailwind CSS utility classes for styling.
- Use Framer Motion for smooth transitions.
- Ensure responsive design (desktop, tablet, mobile).
- Keep components modular and professional.

---

#### Cursor Instructions

When making changes:

- Cross-check content with Aziz-Resume\_2025.pdf.
- Update text, dates, and details wherever necessary.
- Maintain a professional tone in all sections.
- Suggest modern UI/UX improvements but always keep it clean, minimal, and responsive.
